

Brewery tanks

Perfection in stainless steel

*The result of efficient planning:
Cellar assembly of a
CIP (clean in place) plant*

Moeschle know-how for alcoholic drinks— the highest levels of quality

Stainless steel is ideally suited to the storage of beer and all the raw materials and additives needed to produce it. It is taste-neutral, resistant to all citric acids and easy to clean—you just can't imagine work in this sector without it.

The variety of possible constructions available creates the best preconditions for optimum use of space. No matter whether tanks are fitted with cooling or heating systems or an agitator, whether you are

dealing with special sizes or special shapes—with Moeschle tanks, your precious liquid is in safe hands. We can also draw up innovative, forward-thinking solutions for special scenarios which cover your very own storage requirements. "If we can't provide a solution – it's because there isn't one."

We can also draw up innovative, forward-thinking solutions for special scenarios which cover your very own storage requirements. "If we can't provide a solution—it's because there isn't one."

*CIP tanks, Auer
Bräu AG,
Rosenheim/ Bavaria*

*CIP tanks,
Paulaner Brauerei,
Munich*

Our employees are real experts in this sector and will monitor the entire production process—from preparations for production, through production itself to final inspections.

Quality right down to the last detail— impressive expertise

We do not just achieve consistent quality standards by using production plants capable of high levels of performance. Quality starts with selecting suitable materials and suppliers. Here, we focus on placing the most stringent of requirements on service and quality. We aim for long-standing relationships with our suppliers, just as we do with our customers.

Our employees are real experts in this sector and will monitor the entire production process from preparations for production, through manufacture itself to final inspections. All our staff care for each of their „own“ stainless steel tanks within their own section of production with a sense of responsibility and specialist abilities and ensure that your requirements are implemented perfectly. We thereby give our customers what we, demand from ourselves on a daily basis: the best.

Brewery tanks at a glance

- **Pressure vessels**
- **Process vessels**
- **CIP tanks (cleaning in place)**
- **Insulated tanks**
Jacketed vessels for heating and cooling
- **On-site assembly of large tank systems**
- **Walkway and access systems**
